Education

I'm a diligent and detail-oriented team developer who thrives under pressure. I'm looking to join a fast-paced environment where I can continue to challenge myself and grow as a programmer. Technology is ever-changing, and I strive to be in the forefront while building my skills as a developer. I enjoy learning new things and creatively solving problems. I'm currently the lead software engineer for Citizen Math.

Beatleology | **https://innerbeatle.com**

Project to strengthen my back end development skills using JSON Web Tokens for authorization and authentication, MySQL, and Express.js | Quiz based on Beatleology by Adam and Roger Jaquette

DME 4 Me | **https://github.com/grantkee/atp-form**

Custom tool for DME (*durable medical equipment*) providers to process intake for new and existing clients and coordinate health benefits to build high-functioning wheelchairs for clients

---
