Experience

www.citizenmath.com

github.com/grantkee

[linkedin.com/in/grantkee](https://www.linkedin.com/in/grantkee)

Codecademy Certifications

Ruby on Rails | Ruby | Java

Education

I'm a diligent and detail-oriented team developer who thrives under pressure. I'm looking to join a fast-paced team environment where I can continue to enjoy code and grow as a developer. In my spare time, I challenge myself with projects to advance my knowledge of the back end and learn about web application security. Technology is ever-changing, and I strive to be in the forefront while building my skills as a developer.

Beatleology | <https://innerbeatle.com>

Project to strengthen my back end development skills using JSON Web Tokens for authorization and authentication, MySQL, and Express.js | Quiz based on Beatleology by Adam and Roger Jaquette

DME 4 Me | <https://github.com/grantkee/atp-form>

Custom tool for DME (*durable medical equipment*) providers to process intake for new and existing clients and coordinate health benefits to build high-functioning wheelchairs for clients

Citizen Math - Software Engineer

FEB 2020 - PRESENT in Austin, TX

RoR - ES6 - Ruby - JQuery - Liquid - Jekyll - CircleCI - S3cmd - NightWatch - AJAX - HTML5/SCSS
