Codecademy Certifications

Ruby | Java | Ruby on Rails

Machine Learning

Andrew Ng - Stanford University

Education

I'm a diligent and detail-oriented team developer who thrives under pressure. I'm looking to join a fast-paced environment where I can continue to challenge myself and grow as a blockchain developer. I enjoy learning new things and creatively solving problems. I'm passionate about decentralization, blockchains, and open-source projects. Outside of work, I'm an avid hiker, BBQ enthusiast, and disc golfer.

Fractal Networks | <https://fractal-link.com>

Fractal Networks is focused on expanding self-hosting by making it accessible, secure, and collaborative. I have many different responsibilities including backend development, running scrum meetings, and researching the best solutions to design our software.

Citizen Math | <https://citizenmath.com>

Citizen Math is a SaaS company providing thought provoking, interactive math lessons. I successfully launched their new website and oversaw the application's transition to a maintenance phase.

Fractal Networks - Backend Software Engineer

NOV 2021 - PRESENT in Austin, TX
