I'm a diligent and detail-oriented team developer who thrives under pressure. I'm looking to join a fast-paced environment where I can continue to challenge myself and grow as a developer. I enjoy learning new things and creatively solving problems. I'm passionate about building things from the ground up, being on the forefront of new technologies, and participating in open-source projects. Outside of work, I'm an avid hiker, BBQ enthusiast, and disc golfer.

PROFESSIONAL EXPERIENCE

FRACTAL NETWORKS | Backend Software Engineer | fractal-link.com   **Austin, TX**
Rust - Python - Docker - NextJS - SQLite - GitLab CI/CD - WireGuard - RabbitMQ - Microservices   *November 2021–May 2022*

- Continuously design, develop, and deploy secure microservices architecture using Rust, Python, and NextJS with a focus on high availability, low latency, and scalability.
- Research and implement best-practices for building, deploying, and testing RESTful APIs.
- Experience working with various networking protocols including HTTP/2, AMQP, gRPC, WireGuard, UDP, TCP, SSH, WebSocket, and InterPlanetary File System (IPFS).
- Quickly and effectively adapt to rapidly changing business needs by taking the initiative and prioritizing team success. Communicate technical strategies as written RFCs for asynchronous shared understanding.
- Facilitate SCRUM, roadmap, timeline, and business strategy meetings that lead to high-quality decisions owned by the entire team.

CITIZEN MATH | Fullstack Software Engineer | citizenmath.com   **Austin, TX**
Ruby - MySQL - JS - Stripe API - Kubernetes - REST APIs - CircleCI - S3cmd - HTML5 - SCSS   *February 2020-November 2021*

- Demonstrated dependability to deliver high quality code in strict timelines that resulted in a successful launch of the rebranded company website.
- Team lead for all technical aspects of the business including developing, deploying, testing, and documenting code. Created JQuery library that enabled inexperienced interns to onboard quickly.
- Effectively communicated technical details to non-technical stakeholders.
- Excelled at handling multiple assignments at once while working independently and effectively.

AUSTIN CODING ACADEMY   **Austin, TX**
Fullstack Tutor and Teaching Assistant   *April 2019–May 2020*

- Advised and tutored students on their final projects to launch their careers in web development.
- Organized and led weekend meetups, group tutoring sessions, and whiteboard.

EDUCATION
